Federal Milk Order Market Statistics

1998 Annual Summary

PREFACE

Federal milk marketing orders are established under the authority of the Agricultural Marketing Agreement Act of 1937, as amended. The Secretary of Agriculture is authorized by this statute, under certain conditions and with producer approval, to issue milk marketing orders that require handlers to pay at least the minimum specified prices for milk purchased from producers. The complete orders are published in the U. S. Code of Federal Regulations, Parts 1000 to 1199.

This is an annual summary of statistical data published in a bi-monthly report that also is entitled "Federal Milk Order Market Statistics." These data have been compiled from reports that handlers (milk processors) are required to file monthly with the market administrators who administer these orders in the respective markets. These reports show the volume of milk receipts from each source and quantity of milk used in each form. From these reports, data are compiled and totaled for each market by the market administrator.

The data for 1998 are preliminary; those for 1997 are revised. Similar data for the period from 1947 through 1997 have been published in 41 previous annual summaries.

Issued July 1999

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, or marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact the USDA's TARGET Center at (202) 720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W. Whitten Building 14th and Independence Avenue SW. Washington, DC, 20250-9410, or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

HOW FEDERAL MILK ORDER MARKET STATISTICS ARE DEVELOPED AND WHAT THEY MEAN

The statistical data collected under the Federal milk order program make up an important segment of the information needed to administer the orders. These data also provide comprehensive information on milk supplies, utilization, and sales, as well as prices established under the various milk orders.

Statistical Bulletin No. 248, "Federal Milk Order Market Statistics, 1947-56," and annual compilations thereafter contain historical data about Federal milk orders. More current information is available to the public through the bi-monthly, "Federal Milk Order Market Statistics".

WHAT IS A FEDERAL MILK MARKETING ORDER?

A Federal milk marketing order is a regulation issued by the Secretary of Agriculture. Its purpose is to stabilize markets by placing certain requirements on the handling of milk in the area it covers. It is established under the authority of the Agricultural Marketing Agreement Act of 1937, as amended. It requires milk handlers in a marketing area to pay not less than certain minimum class prices established according to how the milk is utilized. These prices are established under the order after a public hearing at which evidence is received on the supply and demand

conditions for milk in the market. A milk order, including the pricing provisions and all other provisions, becomes effective only after approval by dairy farmers. It requires that payments for milk be pooled and paid to individual farmers or cooperative associations of farmers on the basis of a uniform or average price.

WHY ARE FIGURES COLLECTED?

So that a determination can be made as to the amount of milk that handlers use in each price class, handlers are required to file monthly reports showing their receipts of milk from each source and the quantity used or disposed of in each form. Receipts of milk directly from farms and receipts from other plants are reported separately. All major fluid milk products and manufactured milk products are listed on the report form, and handlers are required to specify the volume and butterfat content of all milk used in each product. From these reports, data are compiled and totaled for each market.

On the basis of these reports, the market administrator makes preliminary computations of each handler's obligation and calculates the minimum price the handler must pay producers. The market administrator is the Federal official in each market

who, with the assistance of a staff, administers the terms of the Federal orders.

ARE FIGURES VERIFIED?

Following the receipt of reports from handlers and the computation of the preliminary statement of handlers' obligations, the market administrator sends auditors to handlers' plants, where they examine books and records of plant operations to determine whether milk actually was used as reported and whether required payments were made to producers. Thus, reported data are subject to audit.

Since Federal milk order statistics are developed from complete records of the quantities of milk priced under Federal orders rather than sample data, they provide reliable market information. In using these data, however, it is important to understand the character of fluid milk markets, the scope of data collected and reported under Federal orders, and certain limitations in the use of the data.

FEDERAL MILK ORDER TERMS MARKETING AREA

A marketing area is a designated trading area within which the handling of milk is regulated by the Federal order. Generally, the size of the marketing area is determined by the sales territory of competing handlers.

PRODUCER

A producer is usually any dairy farmer who sells milk to a pool handler. Producers must not be producer-handlers; they must produce milk in compliance with grade A or similar inspection requirements, and their milk must be either received at a pool plant or diverted to a nonpool plant for the account of a pool handler.

HANDLER

A handler is a person or business entity, either a milk processor or a milk distributor, who is subject to the provisions of the order. Under most orders, a handler is any milk dealer whose plant is approved by a duly constituted health authority and who disposes of grade A fluid milk products in the marketing area.

Handlers include persons who sell milk to other milk dealers as well as persons who sell milk to consumers and retailers.

Federal milk orders provide for three general types of handlers. A description of each type follows:

Operators of pool plants (pool handler)

Operators of pool plants must meet minimum performance standards included in each order and are subject in full to the provisions of an order. There are three types of pool plants--distributing plants, supply plants, and cooperative association plants.

Operators of nonpool plants

Nonpool plants are those from which fluid milk products are disposed of in the marketing area or distributed to pool plants but which do not meet requirements for pooling. There are four types of nonpool plants--other order plants, producer-handler plants, partially regulated distributing plants, and unregulated supply plants.

Cooperative associations

Cooperatives that operate pool plants qualify as handlers. Also, a cooperative may have pool handler status under most Federal milk marketing orders if it either diverts producer milk or delivers its members' bulk tank milk directly to pool plants.

CLASSES OF MILK

Classes of milk utilization are defined in each Federal order. All orders provide for three classes. In general, milk disposed of by a handler as whole milk, lowfat milk, or skim milk is classified as class I. If milk is disposed of as fluid cream or used in soft manufactured products such as cottage cheese and frozen desserts, it is class II; and if it is disposed of in hard manufactured products such as cheese, butter, and milk products in dry form, this milk is class III. Some orders provide for a fourth class of milk utilization--class III-A. Class III-A includes producer milk used to produce nonfat dry milk. (For complete information on Federal milk order provisions, see U.S. Code of Federal Regulations, Title 7, Parts 1000 to 1199.)

WHAT IS INCLUDED IN RECEIPTS, SALES, AND PRICES?

RECEIPTS

Federal milk order statistics include volumes of milk received by handlers regulated under each of the Federal orders. The volume of milk, reported as received by handlers from producers, includes all such milk regardless of where it may be sold. Milk identified as that received from producers for a given market may come directly from nearby producers or from producers associated with a supply plant which, although located

several hundred miles from the marketing area, is pooled in the market.

Class I producer milk is the milk delivered by producers for which handlers were required to pay the minimum class I price established by the orders. Total (or gross) class I milk includes any milk from sources other than producers that is assigned to class I.

SALES

In Federal milk order market statistics, an important distinction is made between sales of fluid milk products in a marketing area and dispositions of fluid milk and cream products by handlers regulated in a market. The latter are total dispositions by handlers fully regulated under an order. Dispositions both inside and outside the defined marketing area of that order are included. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources.

On the other hand, "in-the-marketing-area" fluid milk sales (whole milk items and lowfat and skim milk items) represent sales in each of the marketing areas by handlers regulated under the respective order, by handlers regulated under other Federal orders, by partially regulated handlers, and by producer-handlers. These data are useful in appraising trends in the sales of fluid milk products and in the per capita consumption of fluid milk products in the Federal order marketing area.

Order amendments may change marketing areas. In these instances, "in-the-marketing-area" sales may be estimated for partial-year periods to permit accurate year-to-year comparisons of sales data.

PRICES

All prices reported for Federal milk order markets are the minimum prices required to be paid under order terms. Handlers may pay prices in excess of these minimum amounts. Any such payments in excess of Federal order prices are in no way enforced by Federal milk orders and are not reported in Federal milk order statistics.

Class I prices

In all markets, the class I price is based on the Basic Formula Price. To this price is added a fixed differential stated in the order.

Manufacturing class prices

Prices for producer milk used in classes other than class I for the most part are related to the Basic Formula Price. Class II prices are determined by adding a \$.30 differential to the Basic Formula Price. For most orders, the class III price is the Basic Formula Price. In those orders that provide for class III-A, a product price formula is used to set the price.

Uniform (blend) prices

In Federal order markets, minimum prices required to be paid to producers are termed uniform or "blend" prices. In markets where marketwide pools are used, the blend price is the weighted average of all class values of milk used by all handlers, and all producers must be paid at least this average price per hundredweight, subject to butterfat and location adjustments. For orders that provide for individual handler pools, the blend price reported in statistics for each market is a weighted average of all such individual handler's blend prices. In markets where producer prices were established in terms of a base price and an excess price, the blend price reported represented the weighted

average of base and excess payments. In 13 orders, producer prices are based on the value of the components in the milk that they market. These components include butterfat, as well as solids not fat, or protein, or protein and other solids. In these orders, the price received by producers is dependent on the weighted average differential or producer price differential, the price per pound for butterfat, and either the price per pound for solids not fat, protein, or protein and other solids. Some orders also adjust for the somatic cell count in the milk.

Location adjustments (differentials)

The class I price announced by the market administrator is subject to adjustment, depending on the location of the plant. Nearly all orders provide for a downward adjustment of prices at plants that are distant from the major consuming centers. This reflects the cost of hauling milk to the city. Generally, class I prices are progressively lower with increasing distance from the basing point (usually the major city in the marketing area).

Blend prices and base prices paid to producers are subject to adjustment, depending on the location of the plant where producers ship their milk. The adjustment is the same as the location adjustments applied to the class I price.

Butterfat differentials

Most Federal order prices are quoted on a 3.5-percent butterfat basis. To adjust prices for a higher or lower butterfat content, a butterfat differential is used. The butterfat differential is the amount by which the applicable price is increased or decreased for each one-tenth of 1 percent that the butterfat content of the milk is above or below 3.5 percent. The butterfat differential does not represent the value of butterfat, but reflects the difference between the values of 0.1 pound of butterfat and 0.1 pound of skim milk.

COMPARABILITY OF STATISTICS

To ensure that certain changes in the statistics for Federal milk order

markets can be measured comparably, they are summarized to show data for a group of markets that have been in continuous regulation from January 1 of one year through December 31 of the following year, and for which the data have not been affected significantly by marketing area changes. This group of markets is called "comparable markets". However, for a particular market, the comparability of data (producer receipts, class I utilization, milk disposed of in fluid milk and cream products and in manufactured products) can be affected by changes in order provisions other than marketing area changes. These may include changes in classification, pricing, handler definitions, and the like. Also, noticeable differences can occur because of changes in marketing practices that result in changes in the number of producers or plants associated with the particular Federal order market concerned.

SUMMARY OF FEDERAL MILK ORDER OPERATIONS DURING 1998

During 1998, there were 31 Federal milk order marketing areas. The data for Carolina, Southeast, Louisville-Lexington-Evansville, Iowa, Eastern South Dakota, and Greater Kansas City, were affected by marketing area changes and confidentiality restrictions. As a result, there were 25 marketing areas for which most of the data were comparable over the entire two year period.

About three-quarters of the total U.S. population resides in Federal milk order marketing areas. See the map on page 128 for the location of these marketing areas. There were 523 handlers regulated under Federal milk orders in 1998--47 less than in 1997. These regulated handlers operated 326 distributing plants (fluid milk processing plants) and 157 supply plants (manufacturing plants).

During 1998, an average of 72,373 dairy farmers delivered 99.2 billion pounds of milk to handlers regulated under Federal milk orders. This volume of milk accounted for 64 percent of all the milk marketed in the United States and 66 percent of the milk of beverage quality (grade A) sold in the country.^{1/} The value of this milk delivered to Federal milk order handlers at minimum order blend prices was \$14.2 billion, 1.5 percent lower than the value in 1997. Producer deliveries of milk used in class I products (mainly fluid milk products)

totaled 45.0 billion pounds. Class I utilization averaged 45.3 percent of total producer deliveries.

During nearly all of 1998, minimum prices under Federal milk orders were above those of 1997. Class I prices averaged \$16.14 per hundredweight, 12.4 percent (\$1.78) lower than prices in 1997. Among the individual marketing areas, these annual averages varied from a low of \$14.82 in the Upper Midwest to a high of \$17.41 in Tampa Bay. Minimum class II yearly average prices ranged from \$13.84 to \$13.92, class III prices ranged from \$14.20 to \$14.29, and class III-A prices ranged from \$14.85 to \$14.94. Minimum order blend prices averaged \$14.92 per hundredweight in 1997, \$1.82 less than in 1997. During the year, these blend prices ranged from \$13.07 in May to \$17.63 in December.

Sales of fluid milk products in Federal milk order marketing areas during 1998 totaled 43.2 billion pounds (5.0 billion gallons). On a comparable market adjusted daily average basis, these sales were down 0.3 percent from 1997 sales figure. Sales of whole milk and fat-reduced milk products in these marketing areas represent about three-quarters of total U.S. consumption of these products. By product grouping, both sales of whole milk products and sales of fat-reduced milk products decreased 0.3 percent.

During 1998, handlers regulated under Federal milk orders utilized about 51.9 billion pounds of milk, skim milk, and cream in various manufactured products, 10.8 percent below 1997 levels.^{1/} This volume--about 71 percent of the total milk equivalent used to produce manufactured products in the United States--was either processed in their own regulated plants, or transferred or diverted to unregulated nonpool plants for processing. On a whole-milk-equivalent basis, 50 percent of this volume was used in the production of cheese, 21 percent in butter-powder production, 19 percent in the production of frozen desserts (mainly ice cream), and about 10 percent in other products.

^{1/} During 1998, regulated handlers elected not to pool about 16.0 billion pounds of milk that normally would have been marketed under Federal milk orders. This election was most often made because the blend price at the pricing zone of the handler's plant was equal to or less than the class II price, Class III price, or Class III-A price. If this milk had been pooled, the proportions of total U.S. milk marketings processed by regulated handlers would have been higher. In addition, since most of this milk would have been assigned to class III, the reported volumes used to produce class III (manufactured) milk products would also have been higher.

*Data not available. ^{1/} End of year. (Date on which pricing provisions became effective.) ^{2/} End of year. 1955, 1960-70, 1980, and 1990 according to 1950, 1960, 1980, and 1990 U.S. census, respectively. 1975-1979, 1981-1989, and 1991 to date are estimated. ^{3/} Average for year. ^{4/} Prices are simple averages for 1947-60 and weighted averages for 1965 to date. ^{5/} Due to disadvantageous price situations in some markets, handlers elected not to pool an estimated 16.0 billion and 8.4 billion pounds, respectively, that normally would have been pooled under these orders. These price situations occur when the blend price adjusted for location is equal to or less than the Class II, Class III, or Class III-A price. In these situations, handlers may elect not to pool milk that normally would have been associated with the order. Handlers also may elect not to pool milk when it is more advantageous to associate the milk with a State milk order or when the Class III price is too high relative to the pricing programs used to pay dairy farmers.

1/ The value of milk in this Federal milk order is based on multiple component pricing. 2/ Effective October 1, 1997, the order regulating this marketing area was terminated. Figures for 1997 are for January through September. 3/ Data are a summation or weighted average of the Tampa Bay, Upper Florida, and Southeastern Florida marketing areas. The data are combined in order to mask the data for Upper Florida, which are restricted. 4/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period, January 1, 1997-December 31, 1998, and for which the data were not affected significantly by marketing area changes; excludes Carolina, Tennessee Valley, Southeast, Louisville-Lexington-Evansville, Iowa, Greater Kansas City, and Eastern South Dakota, where applicable. 5/ The data for Greater Kansas City and Eastern South Dakota have been combined in order to mask restricted data. 6/ The data for Eastern Colorado and Western Colorado have been combined in order to mask restricted data.

1/ These figures represent the population in the counties, parishes, independent cities, and local subdivisions of the States listed that make up the marketing area. The sources of these figures are "Local Population Estimates," (for each State and the District of Columbia), Series P-26, Bureau of the Census, U.S. Department of Commerce.

2/ These figures are estimated based on the statewide percent changes in population between April 1, 1990 and July 1, 1998. The base data for 1990 were taken from "Population Data for Milk Marketing Areas Under Federal Orders". Copies of this report are available from the Dairy Programs of the Agricultural Marketing Service. These updates are best used as an estimate of population for the year and should not be compared to previous updates to measure change over time.

FOOTNOTES FOR TABLES 6 THROUGH 24.

* Due to disadvantageous price situations in this market during this month, handlers elected not to pool milk that normally would have been associated with this order. See 7/.

** Less than 50,000 pounds.

1/ Effective October 1, 1997, the order regulating the marketing area was terminated. Figures for 1997 are for January-September.

2/ Data are a summation or weighted average of the Tampa Bay, Upper Florida, and Southeastern Florida marketing areas. The data are combined in order to mask the data for Upper Florida, which are restricted.

3/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period, January 1, 1997-December 31, 1998, and for which the data were not affected significantly by marketing area changes; excludes Tennessee Valley, Carolina, Southeast, Louisville-Lexington-Evansville, Iowa, and the Greater Kansas City-Eastern South Dakota areas, where applicable. See 1/, and 8/.

4/ The data for Greater Kansas City and Eastern South Dakota have been combined in order to mask restricted data.

5/ The data for Eastern Colorado and Western Colorado have been combined in order to mask restricted data.

6/ The comparable and all-market totals have been reduced to thousand producers.

7/ Due to disadvantageous price situations in this market during this month, handlers elected not to pool milk that normally would have been associated with this order. These price situations occur when the blend price adjusted for location is equal to or less than the Class II, III, or III-A price. Handlers also may elect not to pool milk when it is more advantageous to associate the milk with a State milk order or when the Class III price is too high relative to the pricing programs used to pay dairy farmers. The majority of this milk would have been pooled in the Chicago Regional and Upper Midwest orders. The total estimated amounts not pooled for this reason are 16.0 billion and 8.6 billion pounds in 1998 and 1997, respectively.

8/ Class I and Class II receipts and utilization data for the Greater Kansas City-Eastern South Dakota marketing area are restricted, effective October 1996, and were restricted for the Iowa area from August through October 1997. These data are excluded from individual market and all market figures, where applicable.

9/ Regional, 25-market, and all-market averages are weighted.

10/ All averages are weighted.

11/ Producer deliveries of milk used in Class III and Class III-A combined for 1997 and 1998 can be determined by subtracting from total producer deliveries as shown on tables 11 and 12, respectively, the appropriate figures on tables 15 and 16, respectively, and this table.

12/ To determine combined Class III-Class III-A utilization, subtract from 100 percent the appropriate figures on tables 17 and 18, respectively, and this table.

13/ The marketing areas shown are the marketing areas for which the data is available and unrestricted.

14/ The marketing areas included in this region are shown on table 6 under the North Atlantic and Southeastern regions; excluding the Florida markets (see 2/).

15/ The marketing areas included in this region are shown on table 6 under the East North Central and West North Central regions; excluding Central Illinois, Southern Illinois-Eastern Missouri, Greater Kansas City, and Eastern South Dakota.

16/ The marketing areas included in this region are shown on table 6 under the West South Central, Mountain, and Pacific regions; excluding Eastern Colorado, Western Colorado, and Great Basin.

See footnotes on pages 68 and 69.

FOOTNOTES FOR TABLES 27 AND 28.

1/ Prices are for 100 pounds of milk of 3.5 percent butterfat content and for the major city in the marketing area. See footnotes below for location at which the price is reported. All averages are weighted.

2/ Zone 1 (Boston). Price at 201-210 mile zone, 72 cents less. Price at Hartford, 10 cents less.

3/ New York metropolitan area. Price at 201-210 mile zone, 72 cents less.

4/ Philadelphia, Baltimore, and Washington, DC. Price excludes a 6-cent direct delivery differential applicable to milk delivered to the Philadelphia area.

5/ Charlotte.

6/ Bristol, Chattanooga, and Knoxville.

7/ Effective October 1, 1997, the order regulating this marketing area was terminated.

8/ Zone 7 (Atlanta and Birmingham). Price at Little Rock, Arkansas 31 cents less; price at New Orleans, Louisiana, 57 cents more.

9/ Jacksonville and Tallahassee.

10/ Miami.

11/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period, January 1, 1997-December 31, 1998, and for which the data were not affected significantly by marketing area changes. Excludes Tennessee Valley, Carolina, Southeast and Louisville-Lexington-Evansville, where applicable. The termination of the Tennessee Valley order affected significantly the comparability of the data for these neighboring marketing areas. Figures also excludes Iowa and Greater Kansas City, where applicable. See 24/ and 27/.

12/ Excludes where applicable, Upper Florida, Southeastern Florida, Eastern South Dakota, Black Hills, and Western Colorado; some of the data used to weight monthly prices were restricted.

13/ Zone 2 (Marquette).

14/ Zone 1 (Detroit). Price excludes a 10-cent direct delivery differential applicable to milk delivered to the Detroit area.

15/ Cleveland and Pittsburgh.

16/ Zone 3 (Columbus). Price at Cincinnati (Zone 4) 7 cents more.

17/ Indianapolis.

18/ Zone 1 (Chicago). Price at Milwaukee (Zone 4) 9 cents less.

19/ Peoria.

20/ Base Zone (Alton). Price at Carbondale (Southern Zone) and St. Louis, 9 cents more.

21/ Zone 1 (Minneapolis).

22/ Sioux Falls, South Dakota.

23/ Zone 1 (Des Moines).

24/ The data used to weight the monthly prices for August through October were restricted and are excluded from the individual market annual average and from all-market figures, where applicable.

25/ Zone 1 (Omaha).

26/ Kansas City and Topeka.

27/ The data used to weight the monthly prices were restricted and are excluded from the individual market annual averages and from all-market figures, where applicable.

28/ Zone 1 (Oklahoma City). Price at Springfield, Mo., 58 cents less.

Footnotes continued on following page.

FOOTNOTES FOR TABLES 27 AND 28. --CONTINUED

29/ Zone 1 (Dallas). Price at Houston, 54 cents more.

30/ Denver.

31/ Grand Junction.

32/ Boise, Idaho.

33/ Salt Lake City, Utah.

34/ Phoenix.

35/ Albuquerque, Santa Fe, and El Paso.

36/ Zone 1 (Seattle and Portland).

See footnotes on pages 82 and 83.

FOOTNOTES FOR TABLES 25, 26 AND TABLES 29 THROUGH 34.

1/ The differential for each one-tenth of 1 percent that the milk delivered by producers varies from 3.5 percent in orders which contain a blend (producer) butterfat differential provision.

2/ Prices are for 100 pounds of milk of 3.5 percent butterfat content and for the major city in the marketing areas. See footnotes on pages 68 and 69 for location at which price is reported for 1997 and 1998. All averages are weighted.

3/ For those markets which have multiple component pricing (see tables 33 and 34), the prices represent the Basic Formula Price plus the weighted average differential price or producer price differential computed under the order.

4/ Effective October 1, 1997, the order regulating the marketing area was terminated.

Annual averages or totals for 1997 are for January-September.

5/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period, January 1, 1997-December 31, 1998, and for which the data were not affected significantly by marketing area changes. Excludes Tennessee Valley, Carolina, Southeast and Louisville-Lexington-Evansville, where applicable. The termination of the Tennessee Valley order affected significantly the comparability of the data for these neighboring marketing areas. Figures also excludes Iowa and Greater Kansas City, where applicable. See 7/ and 8/.

6/ Figures exclude, where applicable, Upper Florida, Southeastern Florida, Eastern South Dakota, and Western Colorado; some of the data used to weight the monthly prices were restricted.

7/ The Class I price for 1997 does not include data for August through October. The Class I receipts and utilization data were restricted for those months. These data are excluded from all-market figures, where applicable.

8/ The data used to weight the monthly prices were restricted. These data are excluded from all-market figures, where applicable.

9/ Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are not subject to location adjustment, except as noted. Markets with the same monthly prices are included in the same marketing area group. The price for milk delivered to the Philadelphia area under the Middle Atlantic order is 6 cents more. The price for milk delivered to the Detroit area under the Southern Michigan order is 10 cents more.

10/ Prices are for the New York metropolitan area (1-25 mile freight zone). Prices at other points are lower; price at 201-210 mile freight zone is 8 cents less.

11/ This marketing area group consists of all marketing areas not included in the marketing area groups listed above it.

12/ This marketing area group consists of the Pacific Northwest, Central Arizona, and Southwestern Idaho-Eastern Oregon marketing areas.

13/ This marketing area group consists of Carolina, Southeast, Michigan Upper Peninsula, Southern Michigan, Eastern Ohio-Western Pennsylvania, Ohio Valley, Indiana, Chicago Regional, Louisville-Lexington-Evansville, Upper Midwest, Iowa, Nebraska-Western Iowa, Tennessee Valley, Southwest Plains, Texas, and New Mexico-West Texas.

Footnotes continued on following page.

FOOTNOTES FOR TABLES 25, 26, AND TABLES 29 THROUGH 34 --CONTINUED

14/ Individual handler pool. Prices are weighted averages of all handlers.

15/ The order for this marketing area requires that producers be paid on the basis of the weighted average differential price, the price per pound for butterfat, and the price per pound for nonfat milk solids.

16/ The order for this marketing area requires that producers be paid on the basis of the producer price differential, the price per pound for butterfat, the price per pound for protein, and the fluid carrier price.

17/ The order for this marketing area requires that producers be paid on the basis of the weighted average differential price, the price per pound for butterfat, and the price per pound for protein.

18/ The order for this marketing area requires that producers be paid on the basis of the producer price differential, the price per pound for butterfat, the price per pound for protein, the price per pound for other solids, and the level of somatic cells in the milk.

19/ In January 1997, the order regulating this marketing area required that producers be paid on the basis of the weighted average differential price, the price per pound for butterfat, and the price per pound for nonfat milk solids. Effective February 1, 1997, the order was amended to require that producers be paid on the basis of the producer price differential, the price per pound for butterfat, the price per pound for protein, and the price per pound for other nonfat solids.

20/ The test data for this market were restricted.

See footnotes on page 87.

FOOTNOTES FOR TABLE 35

1/ "Dairy Market News," AMS.

2/ The National Cheese Exchange was discontinued effective April 25, 1997. Effective with the May 1997 Basic Formula Price, the National Agricultural Statistics Service (NASS) price survey is used in the Basic Formula Price determination. See 3/.

3/ A monthly average price is determined by AMS by volume weighing the weekly prices.

4/ The production in the States of Minnesota and Wisconsin combined for the prior month as first published in "Dairy Products," NASS.

5/ The price paid to producers for manufacturing grade milk by plants in Minnesota and Wisconsin for the prior month as surveyed by NASS.

6/ Effective June 26, 1998, the Chicago Mercantile Exchange discontinued trading on Grade A butter. The Secretary of Agriculture has determined that the Chicago Mercantile Exchange Grade AA butter price less nine cents is equivalent to the discontinued Grade A price, effective June 26.

7/ The applicable base month is the month prior to the month for which the Basic Formula Price (BFP) is announced.

8/ The change in the gross value of milk between the base month and the BFP month as determined by using various product prices, yield factors, and weighting by American cheese and nonfat dry milk production in Minnesota and Wisconsin.

9/ The BFP is the applicable base month price at 3.5% updated by the change in the product price formula. The BFP establishes minimum prices under all Federal milk orders.

10/ This price is determined by adjusting the applicable base month price at test by the change in the product price formula.

11/ This price is determined by adjusting the BFP at 3.5% to the BFP at estimated butterfat using the current month butterfat differential. This price is used to determine the other solids price in Federal orders that use component pricing.

12/ The differential is determined by the following formula: (.138 X Chicago Mercantile Exchange Grade A butter price) - (.0028 X Basic Formula Price at test for determining the butterfat differential).

13/ The Class III-A pricing provision is currently in effect in 21 marketing areas. See tables 27 and 28.

14/ This price series is used in the computation of the Class III-A Prices in all but 3 of the 21 affected marketing areas. See 13/.

15/ This price is determined by AMS from combining price series published in "Dairy Market News."

16/ This price series is used in the computation of the Class III-A Prices in the western marketing areas. See 13/.

17/ 9 less (0.4 divided by the applicable nonfat dry milk price).

18/ (Butterfat differential times 35) plus (applicable nonfat dry milk price less 12.5 cents) times (the applicable modified yield factor).

19/ See tables 29 and 30 and related footnotes to find the marketing areas that use this Class III-A price series.

20/ New England, New York-New Jersey, and Middle Atlantic also use a seasonal adjustment in the computation of Class III-A prices.

FOOTNOTES FOR TABLES 36 THROUGH 43

1/ Whole milk products include plain and flavored whole milk and small amounts of miscellaneous whole milk products.

2/ In-area sales include total sales in each of the areas by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

3/ Effective October 1, 1997, the order regulating this marketing area was terminated.

4/ Figures are based on the same group of comparable markets--markets where the orders were in effect the entire period, January 1, 1997-December 31, 1998, and for which the data were not affected significantly by marketing area changes; excludes Tennessee Valley; see 3/.

5/ Figures adjusted to eliminate variations due to calendar composition.

6/ Fat-reduced milk products include plain and solids added fat-reduced milk, buttermilk, flavored milk drinks, and small amounts of miscellaneous fat-reduced milk products.

7/ Fluid milk products include all whole milk and fat-reduced milk products; see 1/ and 6/.

8/ See table 41 for the markets included; excludes New York-New Jersey and Tennessee Valley.

9/ Yearly totals may not add due to rounding.

10/ May include restricted products and small amounts of miscellaneous whole milk and fat-reduced milk products.

11/ Totals for individual products include restricted data which were not shown for individual markets. Totals may not add due to rounding.

12/ Includes all Federal milk order markets in effect as of December 31, 1998, except New York-New Jersey.

13/ Sales were reported for flavored whole milk and flavored fat-reduced milk products combined. These figures were estimated.

14/ The breakdown into plain and milk solids added was not available.

15/ Restricted, represents sales by fewer than three handlers. See 11/.

16/ Data are for January through September; see 3/.

| Total Fluid Milk/Cream Products <u>8/</u> | 2,360.4 | 2.35 | |

See footnotes on page 118.

FOOTNOTES FOR TABLE 44

1/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources. Sour cream, yogurt, and eggnog are reported on a used to-produce basis.

2/ Includes all markets in effect during 1997-1998, including the following markets which cannot be shown individually because the data were restricted: Upper Florida, Tampa Bay, Southeastern Florida, Central Illinois, Eastern South Dakota, Greater Kansas City, Michigan Upper Peninsula, and Western Colorado. Totals for individual products include restricted data which were not shown for individual markets. Total may not add due to rounding.

3/ Sales were reported for flavored whole milk and flavored fat-reduced milk products combined. These figures were estimated.

4/ Includes some 2 percent reduced fat milk with solids added. See 5/.

5/ The breakdown into plain and milk solids added was not available.

6/ Includes some 1 percent low fat milk with solids added. See 5/.

7/ Includes some skim milk with solids added. See 5/.

8/ May include restricted products and small amounts of miscellaneous fluid milk and fluid cream products.

9/ Restricted, represents sales by fewer than three handlers. Figures are included in the total for the market.

10/ Effective October 1, 1997, the order regulating this marketing area was terminated. The data for 1997 are January through September.

FOOTNOTES FOR TABLES 45 THROUGH 48

1/ Represents all Federal milk order markets in effect during 1997-1998. See tables 47 and 48 for the marketing areas included in 1997 and 1998, respectively.

2/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are partially estimated and revised.

3/ Also includes ricotta cheese.

4/ Includes condensed whole milk and condensed skim milk. Due to a change in reporting procedure, the breakdown of condensed milk in the New York-New Jersey market was not available; figures are included under "Other factory products and uses."

5/ "Other factory products" includes evaporated whole milk; milk, skim milk, and cream used in food products; whole milk powder; whey powder; and aerated, frozen, and plastic cream. (2,814,380 thousand pounds milk, skim milk, and cream; and 109,279 thousand pounds butterfat). Other "uses" include milk, skim milk, and cream used for animal feed; dumped or spilled; plant loss; and unidentified (1,417,944 thousand pounds milk, skim milk, and cream; and 53,334 thousand pounds butterfat).

6/ Total may not add due to rounding.

7/ "Other factory products" include evaporated whole milk; milk, skim milk, and cream used in food products; whole milk powder; whey powder, and aerated, frozen, and plastic cream (2,668,279 thousand pounds milk, skim milk, and cream; and 106,470 thousand pounds butterfat). Other "uses" include milk, skim milk, and cream used for animal feed; dumped or spilled; plant loss; and unidentified (1,487,901 thousand pounds milk, skim milk, and cream; and 61,562 thousand pounds butterfat).

8/ Individual marketing area figures include restricted quantities for other products.

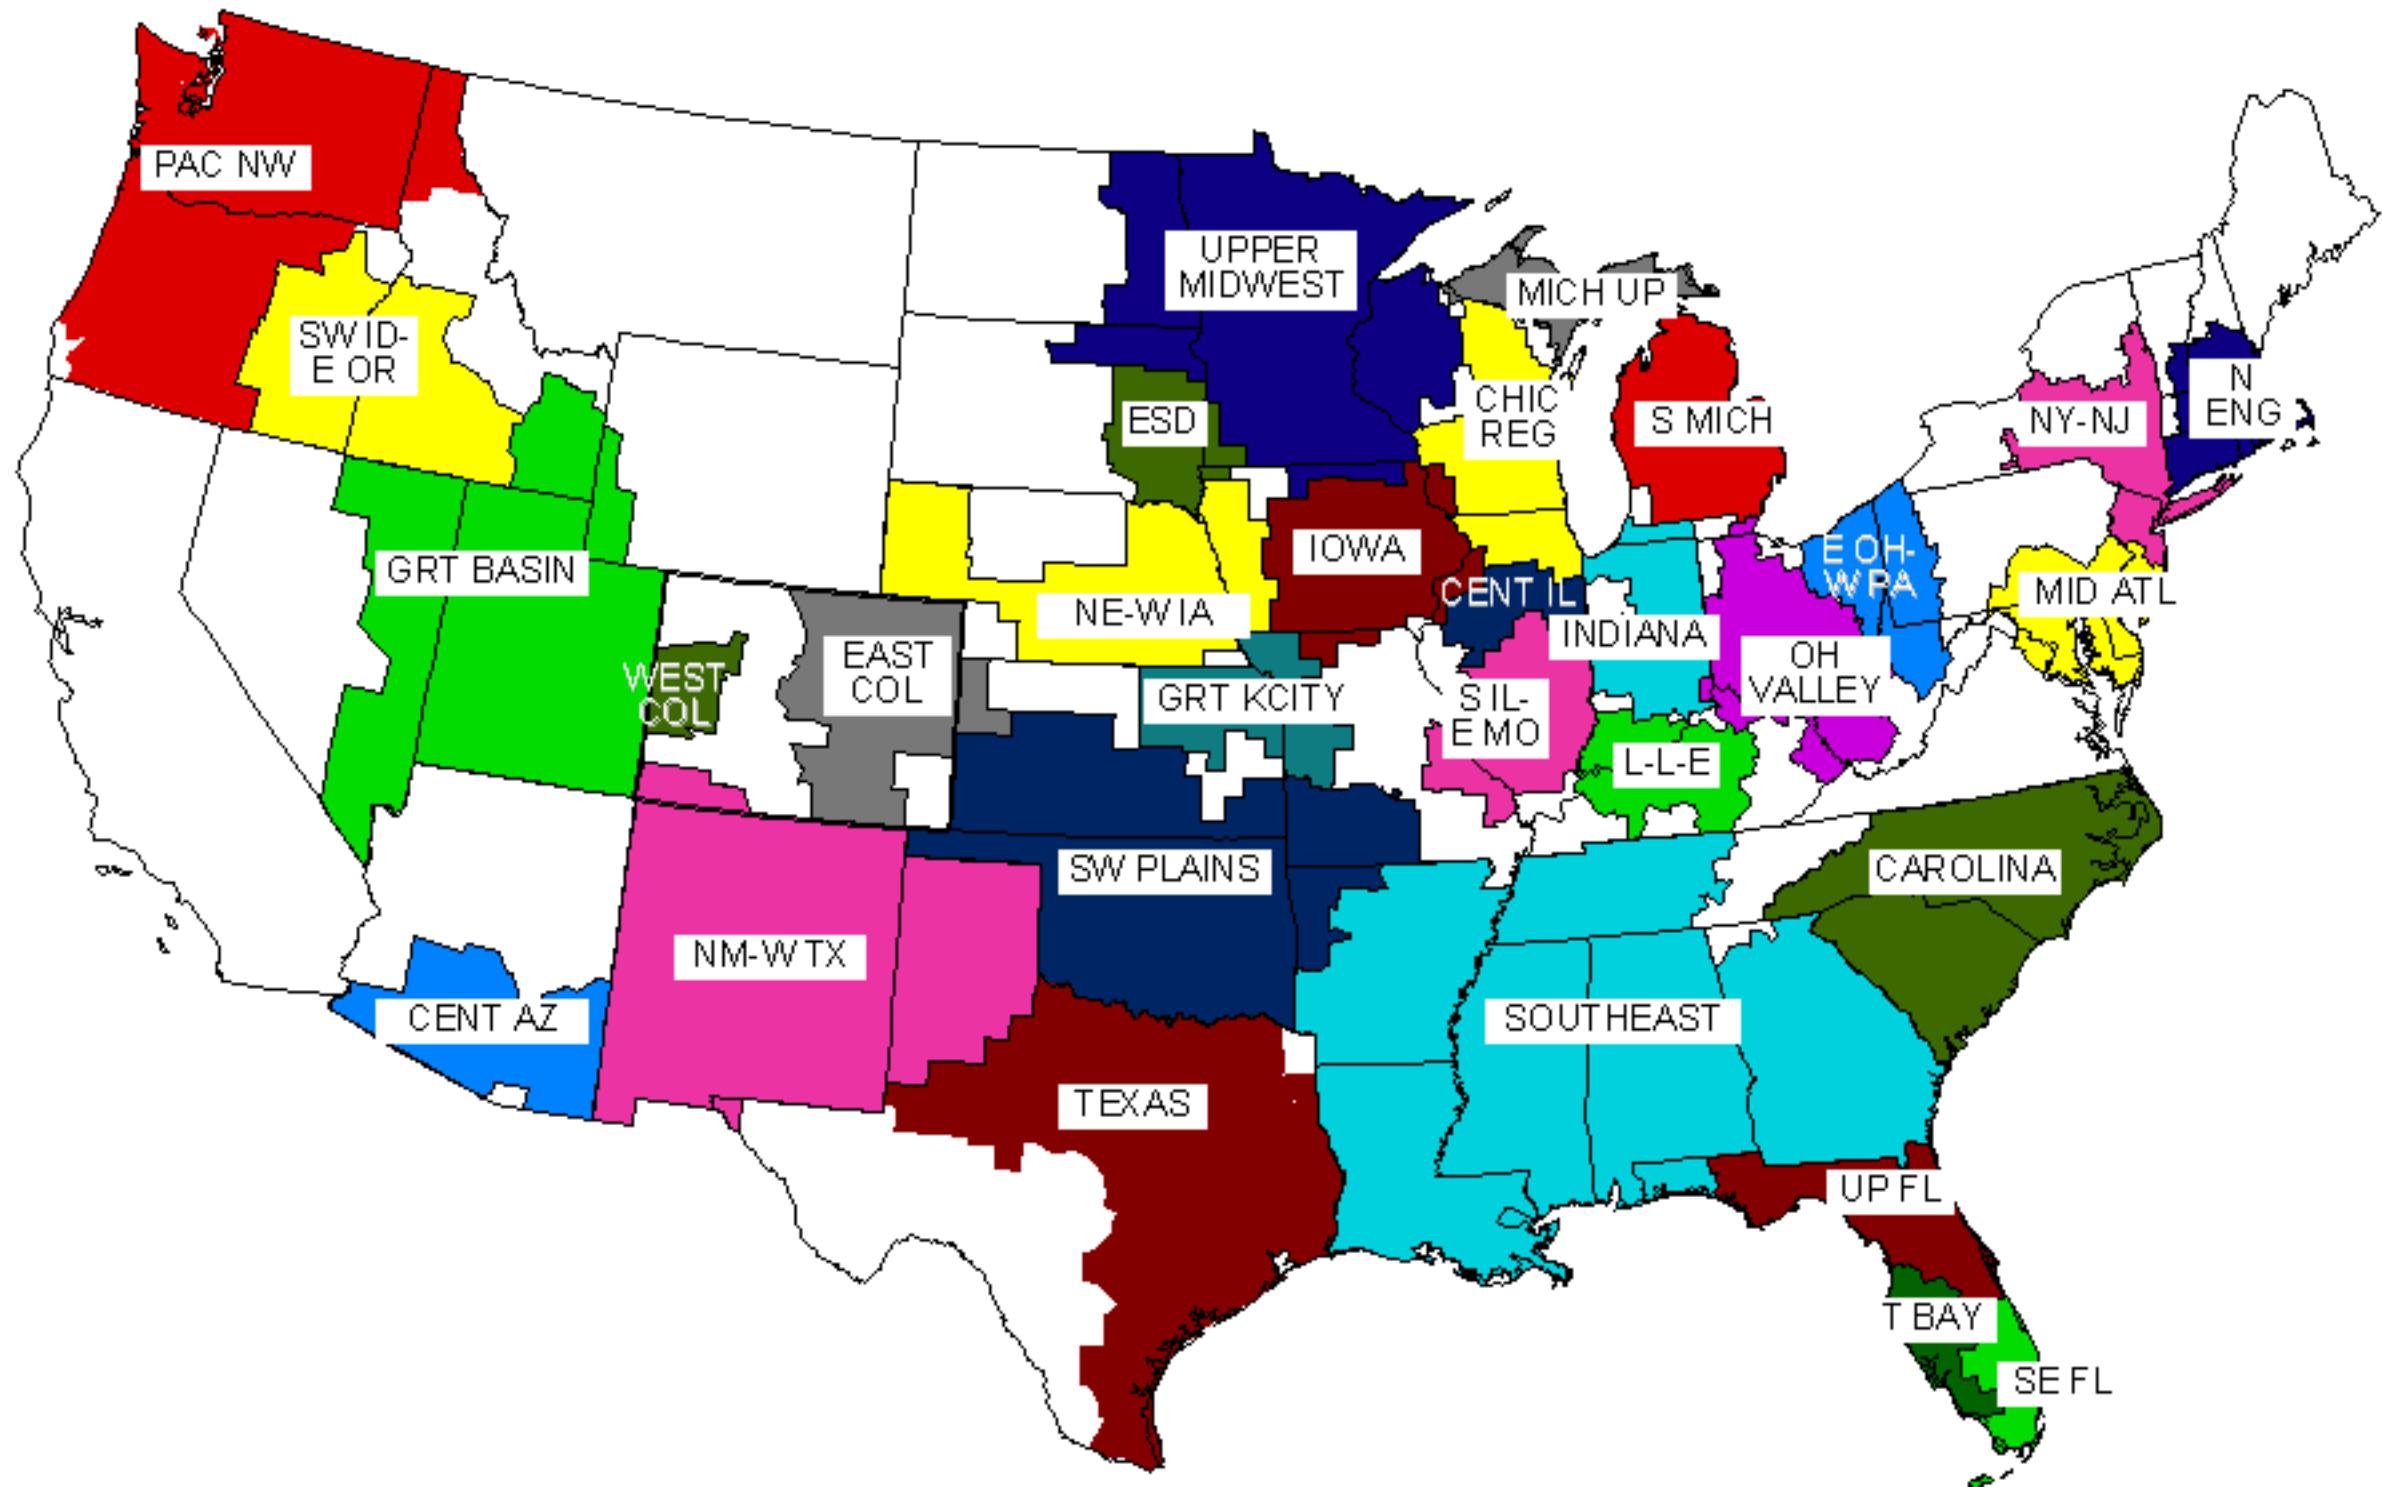

9/ Less than 0.05 percent.

10/ Restricted, represents data for fewer than three handlers; see 12/. Data are included in "Other factory products and uses."

11/ Effective October 1, 1997, the order regulating this marketing area was terminated. The data for 1997 are for January through September.

12/ All markets in effect during 1997-1998 including the Central Illinois, Eastern South Dakota, Greater Kansas City, Michigan Upper Peninsula, and Western Colorado areas which cannot be shown individually because the data, in entirety, were restricted. Also included are Upper Florida, Tampa Bay, and Southeastern Florida areas, for which all individual product data were restricted. The market totals for these marketing areas, in thousand pounds, for milk and cream and butterfat, respectively, are: for 1997, Upper Florida (19,339 and 1,674), Tampa Bay (359,339 and 27,737), and Southeastern Florida (101,257 and 14,026); for 1998, Upper Florida (20,291 and 3,829), Tampa Bay (328,243 and 23,739), and Southeastern Florida (74,040 and 10,816). Each individual product total includes restricted data which were not shown for individual markets.

Current Marketing Areas Under Federal Milk Orders

Special Articles Published in the 1998 Monthly Summaries of
"Federal Milk Order Market Statistics"

FMOS - 424, January and February

How Federal Milk Order Market Statistics Are Developed and What They Mean.
This article describes Federal milk order terms and statistics, and discusses why Federal milk order statistics are collected and published.

FMOS - 425, March and April

Federal Milk Order Market Administrators Budgets, 1997 and 1998. For each market administrator, budgets representing estimated expenditures, by type of expense and estimated income, and by type of fund, are shown.

SUMMARY OF MAJOR ORDER ACTIONS DURING 1998

JANUARY

There were no final actions effective during this period.

FEBRUARY

There were no final actions effective during this period.

MARCH

There were no final actions effective during this period.

APRIL

There were no final actions effective during this period.

MAY

There were no final actions effective during this period.

JUNE

Determination:

New England, et al - June 26 (63 FR 35564, 6/30/98). This action announces the Secretary's determination that the Chicago Mercantile Exchange (CME) Grade AA Butter Spot Call for the month minus 9 cents is an equivalent butter price alternative to the CME's Grade A Butter Spot Call contract which will cease trading on June 26, 1998. The butter price series is used in computing the butterfat differential and the Basic Formula Price (BFP) in all Federal milk marketing orders. For June 1998, the butterfat differential and the BFP will be computed using the equivalent butter price series in conjunction with the CME Grade A butter price.

JULY

There were no final actions effective during this period.

AUGUST

There were no final actions effective during this period.

SEPTEMBER

Suspension:

Southwest Plains - September 1 (63 FR 46866, 9/3/98). This action suspends, from September 1998 through August 1999, the supply plant shipping requirement that producers deliver at least one day's production of milk to a pool plant during the month before their milk is eligible for diversion to a nonpool plant.

OCTOBER

There were no final actions effective during this period.

NOVEMBER

There were no final actions effective during this period.

DECEMBER

Termination:

Nebraska-Western Iowa - December 1 (63 FR 70994, 12/23/98). This action terminates the advertising and promotion provisions of this order with respect to milk marketed on or after December 1, 1988.
